**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Feeling cold at height despite the sunshine given the wind strength. Be prepared with appropriate layers.

Forecast for Thursday 07 Mar 2024

Weather: Rather cloudy to start with cloud most extensive across eastern slopes where locally thick enough for some drizzle. In the west a few mist or fog patches, mainly in valleys. Cloud, mist and fog lifting and breaking during the morning, leading to good sunny spells. Cloud increasing through the afternoon, with a chance of passing showers, these perhaps lingering into the early evening where they could turn wintry over the highest ground. Blustery winds at height.

Maximum wind: East or southeast 30-35mph, gusting 40-45mph later.

Chance of cloud-free hill tops above 800m: 20-30%, improving 80% during the afternoon.

Low Cloud and visibility: Scattered or broken cloud base 400-500m at first, mainly in central and eastern areas. This lifting to few or scattered cloud base 700-900m by the afternoon, then becoming scattered to broken into the evening. Visibility poor in hill fog, otherwise very good but temporarily reduced in drizzle or showers.

Temperature: **Valleys:** Plus 1 rising to plus 7 Celsius
At 800m: Plus 1 to plus 3 Celsius
Freezing level: 1000-1200m.
